Target® 1121 - Cable Duct Grout

1121 - High flow, unsanded, cementitious grout

Target® 1121 is a premium quality, high flow, unsanded, cementitious grout.

Target® 1121 does not depend upon the formation of hydrogen, carbon monoxide, air or the use of gypsum for pre-hardened and post hardened expansion.

Target® 1121 is designed to exceed the requirements of CRD-C621, of ASTM C1107 as well as the PTI specification.

For uses where high fluidity, extended working time, no bleeding, segregation or plastic settlement shrinkage, high strength and resistance to chloride penetration are required.

Applications include:

- Grouting of post tensioning cables or bars where complete encapsulation of the reinforcing and protection from corrosion are required.
- Pumping grout through small opening over long distances.
- Grouting cable anchorages for highly stressed reinforcing steel.

Please refer to the technical data sheet for more details and instructions.
